

Millie was found with her brother under weight and very scared. She was so infested with fleas that they covered her eyes. She was taken into CARE's foster care program, seen by a vet, and started the process of putting weight on . She was adopted on Sept 16. 2000 by Stacey Voorhees and is doing great. She has found a loving home and a lifetime friend...

thanks again Stacey for helping an animal into a loving home.
