Holiday Plants

Amaryllis
Celastrus
Chrysanthemum
Colchicum
Euonymus
Euphorbia milii
E. pulcherrima Poinsettia
Helleborus Christmas Rose
Ilex (HOLLY)
Phoradendron American Mistletoe
Solanum

CHOCOLATE- contains theobromine which is toxic and cannot be metabolized by the cats liver

TURKEY- too much can make kitty sick resulting in inflammation of the pancreas which could be fatal.

BONES- left over from feast could lodge in their throat and puncture vital organs etc with in the cat

STRING-YARN*OR SAME AS*- Cat's are unable to spit things out of their mouth due to the barbs located in the back of the cats mouth. So the string literally will saw a hole in their intestines on the way down.

BURNING CANDLES
CANDY AND FOIL WRAPPERS
ORNAMENTS RINGS AND HANGERS
BROKEN ORNAMENTS
ANGEL HAIR

Some signs of plant poisoning are:

- 1.continual vomiting
- 2.diarrhea
- 3.refusal of food
- 4.pale gums or tongue
- 5.swollen tongue

6.abdominal pain

7.convulsions

What To Do:

If your cat is displaying any one or combination of these symptoms it is possible it has ingested a poisonous plant. Plant poisoning is dangerous and medical attention should be sought immediately. Try to identify the plant that has been ingested and have its scientific name available when you contact your veterinarian. This information will provide for a quicker diagnosis and treatment of your pet.
